

Optimising pathways: NHS capacity

- Around **167,000** people die from cancer each year in the UK and the disease devastates countless more lives¹
- **One in three** people diagnosed with cancer in England are waiting more than 62 days to start treatment²

We commissioned a report to highlight the actions policymakers can take to **improve cancer service capacity** in England which has been presented to:

evoke incisive health

Capacity to deliver:
unlocking the resources
required to improve cancer
outcomes in England

Mike Birtwistle

We are
now establishing
partnerships that can
support **sustainable
local innovation** with a
focus on **capacity
freeing** initiatives
